电机使用注意事项：
Notes for motor use:

1、禁止私自拆解电机，拆解电机会导致校准失效，同时我司将不再提供退换保修以及售后支持服务；
prohibit the disassembly of the motor, the disassembly of the motor will lead to calibration failure, and our company will no longer provide return warranty and after-sales support services;

2、电机上所有接口都不支持热插拔，需要先插线后上电，同时控制信号的地线需要接；
all the interfaces on the motor do not support hot plug, need to plug in the power, and the ground wire of the control signal needs to be connected;

3、电机在高转速运行过程中不允许突然堵转，突然被动堵转会使电机反充高压导致驱动器损坏；
the motor is not allowed to suddenly block in the process of high speed operation, sudden passive blocking will make the motor back charge high voltage and cause driver damage;

4、严格按照电机丝印上的电压区间供电，禁止过压使用；
in strict accordance with the voltage range on the motor screen printing, prohibit the use of overvoltage;

5、及时监测电机温度，通过降低功率或者增加散热的方式，使电机工作在合理的温度区间；
timely monitoring of the motor temperature, by reducing the power or increasing the cooling way, make the motor work in a reasonable temperature range;

6、在装入设备前，建议使用我司上位机先进行相同工况的调试；
before loading the equipment, it is recommended to use our company's host computer to debug the same condition first;

7、及时更新固件以获得更优异的电机性能和功能；
timely update the firmware to obtain better motor performance and function;
